Re: Application for Public Hearing  
Authority to Commingle Production  
Vintage Petroleum, Inc.  
South Pass Block 24 and West Bay Fields  
South Pass 24 Commingling Facility  
Plaquemines Parish, Louisiana

Dear Mr. Boudreaux,

Application is hereby made on behalf of Vintage Petroleum, Inc. for the calling of a public hearing, after legal notice, to consider evidence relative to the issuance of an order approving the commingling in Vintages's proposed South Pass 24 Commingling Facility of gas and liquid hydrocarbons produced from the South Pass Block 24 and West Bay Fields, Plaquemines Parish, Louisiana. A like application is also being filed for Vintage's West Bay Commingling Facility.

At such hearing, Vintage will request that it be authorized to commingle and allocate production based on monthly well testing utilizing two and three phase well tests and wellhead shakeout analysis as opposed to the previously approved method of unit metering, all as normally allowed in compliance with provisions of Section 1505 2.a of Statewide Order 29-D-1.

In Vintage's opinion, this proposal will promote conservation of the natural resources within the State of Louisiana, will prevent waste, will protect the rights of all parties at interest and will result in substantial economic savings without results that may be in any way inconsistent with conservation policies, statutes or regulations of the State of Louisiana. Further, in the opinion of the applicant, the commingling procedure proposed will provide reasonable, accurate measurement, will not create inequities and will insure that the owner of any interest will have the opportunity to recover his just and equitable share of the reservoir content.

Enclosed herewith are the following:

1. An explanation of the flow of gas and liquid hydrocarbons; the procedures and frequency of well tests and for the calibration and proving of metering devices; and the formulas to be utilized for production allocation.
2. Diagrammatic sketches of the proposed mechanical installation.
3. Statement of applicant regarding the accuracy of well tests for allocation of production.
4. A list of Interested Parties affected by this application; and
